

DHANUSH M

AI Engineer | LLM & Agentic AI Developer

+91 9123514328 • arceusdhanush05@gmail.com • Chennai, India • [linkedin.com/in/dhanush-m-962499344](https://www.linkedin.com/in/dhanush-m-962499344) • github.com/DhanushArceus05

PROFESSIONAL SUMMARY

AI Engineer with hands-on experience building production-ready Agentic AI and LLM-powered applications using Python, Google Gemini, LangChain, and RAG pipelines. Skilled in prompt engineering, vector embeddings, and full-stack development (React, Node.js, MongoDB). Combines a strong machine learning foundation with practical experience designing autonomous, context-aware AI agents and scalable web systems, backed by clear communication and Agile collaboration.

TECHNICAL SKILLS

AI & Generative AI: LLMs, Agentic AI, Prompt Engineering, RAG, Google Gemini API, LangChain, ChromaDB, Vector Embeddings, Machine Learning, Recommendation Systems

Programming: Python, JavaScript, SQL

Frontend: React, HTML, CSS, Tailwind, Chakra UI, Bootstrap

Backend: Node.js, Express.js, REST APIs, Flask, Django

Databases: MongoDB, Firebase, MySQL

Tools: Git, GitHub, Docker, Streamlit, Postman, Vite

PROFESSIONAL EXPERIENCE

MERN Stack Web Developer Intern — CODTECH IT Solutions Pvt. Ltd.

Feb 2025 – Apr 2025

- Engineered scalable RESTful APIs with Node.js, Express.js, and MongoDB, implementing JWT authentication to secure endpoints and protect user data.
- Developed responsive, production-style interfaces in React.js, focusing on clean component architecture and consistent cross-device behavior.
- Integrated Socket.io to enable real-time, bidirectional communication for a live chat feature, supporting concurrent multi-user sessions.
- Collaborated within a 5-member Agile/Scrum team, contributing to daily stand-ups and sprint reviews to ship scalable applications on schedule.
- Debugged and optimized full-stack code across the MERN stack, strengthening reliability and maintainability of deployed features.

PROJECTS

Persona-Adaptive Customer Support Agent

Python, Google Gemini 2.0 Flash, LangChain, ChromaDB, Streamlit, RAG

- Built an Agentic AI customer support system that automatically classifies users into personas and tailors response tone and depth accordingly.
- Implemented Retrieval-Augmented Generation (RAG) with ChromaDB and Gemini embeddings to ground responses in accurate knowledge-base content.
- Engineered persona-specific prompts and multi-turn conversational memory using LangChain, improving response relevance across sessions.
- Designed a confidence-scoring mechanism to flag low-confidence responses and trigger structured human escalation for complex queries.

Library Management System (Librix)

React, Node.js, Express.js, MongoDB, JWT

- Developed a full-stack library management platform with role-based authentication, securing distinct access levels for admins and members via JWT.
- Implemented a complete book borrow/return workflow backed by RESTful APIs, with real-time status tracking across MongoDB collections.
- Added search and filter functionality to help users quickly locate books by title, author, and availability.
- Built responsive admin and member dashboards in React for managing inventory, transactions, and user activity.

Netflix Movie Recommendation System

Python, Scikit-learn, Pandas, NumPy, Matplotlib

- Cleaned and preprocessed large-scale user rating data in Python, addressing missing values and inconsistencies prior to modeling.
- Performed exploratory data analysis (EDA) to uncover genre trends and rating patterns, informing model feature selection.
- Built a collaborative-filtering recommendation pipeline using Scikit-learn to generate personalized movie recommendations.

The Super App

React, Zustand, Tailwind, REST APIs

- Built a multi-feature React application integrating weather, news, and movie recommendation modules into a unified dashboard.
- Integrated multiple third-party REST APIs, using environment variables to securely manage API keys across modules.
- Managed application state with Zustand and styled a clean, responsive interface using Tailwind CSS.

EDUCATION

B.Sc. Computer Science — University of Madras

Aug 2022 – May 2025

Relevant Coursework: Data Structures & Algorithms, Database Management Systems, OOP, Web Technologies, Software Engineering

CERTIFICATIONS

- Professional Certification Program in AI & Data Science — Intellipaat, iHub DivyaSampark, IIT Roorkee (Coursework, Assignments, Capstone Project & Placement Assessments completed; certificate issuance in progress)
- MERN Full Stack Developer — IRC Certification, NextWave (CGPA: 10.00)
- React JS — Coursera / Udemy (Apr 2025)
- Programming Foundations with Python (Dec 2024) • SQL for Database Management (Nov 2024)

LANGUAGES

English: Fluent — Professional Working Proficiency • Tamil: Native
